PERSONAL PROJECTS

BASIC BANKING SIMULATION
- This project includes functionalities for withdraw, deposit, and interest calculation. It assumes the basic details such as account number, customer name, and balance for each customer. The program uses simple console input and output for user interaction

MARKET BILLING SYSTEM
- This project includes the shopping process by allowing users to input product details, including prices and quantities. The system aggregates these products into a cart, enabling users to review their selections. Once all items are chosen, the system generates a comprehensive bill, detailing the purchased items and their respective
